

IMAGINE HOUSTON

Downtown Houston is where the city's finest features merge into one splendid metropolitan threshold. The Historic District marks the city's original central point with cafes, bars and nightclubs set inside original nineteenth century buildings. The Warehouse District is home to the city's thriving art community, with studio and galleries celebrating the work of local artists while the Skyline District is home to 14 Fortune 500 companies. Downtown Houston is truly the center of one of the nation's greatest cities.

IMAGINE HOUSTON

VOLUME FOUR

FMC Technologies

IMAGINE HOUSTON

VOLUME FOUR

FMC Technologies is backed by more than a century of accomplishments in a wide range of complex and exacting business specialties. From a continuous spray pump in California's orchards in the 1880s, to some of the world's most sophisticated technology and equipment for the global energy industry, FMC Technologies and its predecessor companies have a long history of technical innovation.

While there is great strength in the diversity of our business and product portfolio, there is a common denominator that ties each of our businesses together—knowledge-based solutions engineering. Through our deep understanding of our customers' businesses and our relentless obsession with performance, we develop innovative real-world solutions that put even the most daunting challenges within reach.

Our people, our technologies and our performance have consistently set us apart from our peers and made us the leading subsea equipment supplier in our industry. Headquartered in Houston, long known as the energy capital of the world, our city is also one of the most ethnically and culturally diverse in the country. Houston offers a variety of educational, cultural, social and business opportunities and networks that tourists and new residents will thoroughly enjoy.

We are proud to operate in this city and hope you find the contents of this book beneficial as you learn more about what Houston has to offer you.

Sincerely,

John T. Grempe
Chairman, President and CEO
FMC Technologies, Inc.
