AIR PRODUCTS

Air Products serves customers in industrial, energy, technology and healthcare markets worldwide with a unique portfolio of atmospheric gases, process and specialty gases, performance materials, and equipment and services. The company has annual revenues of \$10 billion, operations in over 40 countries and over 20,000 employees around the globe.

We are a leading supplier

Air Products has been a leading global supplier to the refining and chemical processing industry for over 65 years. Through the unique talents of our employees, we are helping businesses operate smarter, cleaner and more economically all around the world with options including pipeline hydrogen, oxygen and nitrogen, on-site hydrogen and syngas plants, cryogenic and non-cryogenic oxygen and nitrogen plants, merchant supplied liquid, cylinders, industrial nitrogen services, and more.

For over 40 years, Air Products has invested in and continues to expand its Gulf Coast operations. The Gulf Coast pipeline network extends from the Houston Ship Channel in Texas to Lake Charles, La. This network pro-

vides a highly reliable hydrogen, nitrogen, oxygen and carbon monoxide supply to approximately 80 refinery and process industry customers.

We are a community leader

Air Products is recognized for its commitment to safety, the environment and the community. For example, Air Products has been nationally recognized as a safety leader numerous times and recently received an Environmental Excellence Award for the redesign of a nitrous oxide pump and recognition by the Economic Alliance Houston Port Region as a significant supporter of small and minority businesses in the Houston region.

Air Products and its employees are committed to Social Responsibility and work in partnership with local community leaders to identify the most critical local needs. We then work to meet those needs through a proactive plan of community relations, employee involvement, grant making, and implementing principles that support national initiatives such as Responsible Care®, an environment, health, and safety initiative of the American Chemistry Council in Washington, D.C.
