Dentiq Dentistry has a longstanding legacy of excellence in Houston that began with the founding of the original practice in 1976 by Edwin Cordray, DDS. Like Houston, the practice has grown and changed through the years. In 2005, Barbara Johnson, DDS, partnered with Cordray and eventually acquired the practice, transforming it into the multidisciplinary practice it is today that offers most dental specialties under one roof. In 2013, Dentiq experienced further growth with the addition of a new partner: Sridhar Sista, DDS.

Dentiq Dentistry's mission, "take great care of great people," is based on a diagnostics-driven approach to exceptional dentistry. Dentiq pays special attention to the unique aesthetic needs of each patient. Whether high-tech implants with drastically reduced healing time, simple recare appointments, or complete smile makeovers, Dentiq doctors and specialists focus on what matters most to each patient: their personal preferences, comfort, expertise and access to the best in medical health technology.

Throughout the years as a Dentiq patient, you can be assured that you and your family's dental-health needs,

and subsequently your overall health, will be well cared for. Dentiq patients expect only the best and receive just that as Dentiq customizes its services to fit each patient's specific preferences.

Call to book your complimentary consultation today to experience the Dentiq difference. On your first visit, you will receive high-resolution images, digital x-rays and a 3D CAT scan to allow the Dentiq team to fully evaluate your dental health and aesthetic needs. ■
