Strike, LLC is a leading single-source energy services provider, known for its exceptional safety and quality standards. The company's integrated network of energy services ranges from upstream production, processing and gathering facilities to high-pressure transmission and distribution lines. In everything, Strike's mission is to have a positive impact on the energy industry by developing a culture built on safety and providing premier energy services throughout North America to assist clients in achieving operational excellence.

Formed in 2003 to fulfill a need in the Midstream Energy Sector, Strike has been recognized by Inc. 500 as one of the fastest growing privately held energy-services companies in the country for the past six years. Strike's business model employs a "One Step Ahead" innovation mentality with which the Strike team strives to exceed industry benchmarks. Safety is the most important benchmark to exceed, making it the center of Strike's culture.

Strike continues to develop processes that focus on customer satisfaction and maintains an ease of doing business that facilitates positive economic outcomes. To address the complexities associated with this type of work, Strike offers clients the ability to track and budget their time and material projects using a state-of-the-art cost-tracking portal called the Strike Field Ticket Management System™ (FTMS™). This invaluable tool provides clients with pertinent real-time data regarding their projects, offering a sense of transparency, accountability and peace of mind.

Strike's foundation has been built on the following pillars: safety, excellence, quality, accountability, performance, integrity, passion and long-term relationships. In the past 10 years, Strike's leadership team has worked hard to create a culture around each of these pillars, and their commitment to excellence has always gone beyond the bottom line. ■
