

- URS has more than 50,000 employees worldwide.
- The Company's operations span nearly 50 countries in the Americas, Europe, the Middle East, and Asia/Pacific.
- We are a top-tier contractor to the U.S. federal government, providing a range of engineering, technical assistance, information technology, operations and maintenance, and management services.
- We are a major environmental contractor to the U.S. Department of Energy, serving on the management teams of four of the largest U.S. national research laboratories, as well as managing and disposing of nuclear waste from former Cold War weapons facilities.
- We are a leading provider of design, construction and production services across the upstream, midstream and downstream oil and gas supply chain, including unconventional oil and gas development.
- We offer full-service capabilities for infrastructure projects involving surface, air, mass transit and rail transportation; ports and harbors; public buildings; and water/wastewater facilities.
- URS designs, constructs, retrofits, and maintains virtually every type of power plant, as well as transmission and distribution systems, and we specialize in clean-air technologies and the replacement of major nuclear plant components.
- The Company provides life-cycle services including facility management and production maintenance, for industrial clients in the chemical, pharmaceutical, manufacturing, and mining industries.

Reputations are built.

A company should be measured by what it accomplishes, not by what it promises. Today, with the capability to bring our expertise to bear in any stage of a project's life cycle—whether it's in the Federal, Oil & Gas, Infrastructure, Power or Industrial sector—our goal remains the same. To help our customers succeed. Which is why more people are turning to us to get it done. We are URS.
