RAPID RESPONSE. EXPERT CARE.™
When faced with an unexpected accident or illness, you have a choice. You can sit for hours in a hospital emergency room while your condition possibly worsens. Or, you can see a physician who is trained in Emergency Medicine in mere minutes. The answer is obvious.

If you need immediate medical attention, but don't want to wait to see a doctor, come to Texas Emergency Care Center. With two locations in Cypress and Pearland, we're open 24 hours a day, seven days a week, 365 days a year. We are a free-standing emergency room, which means we provide all the same services as a traditional emergency room; we're just not attached physically to a hospital. The facility offers the latest in medical equipment and state-of-the-art testing capabilities, including:

- A full-service laboratory that allows us to analyze samples on-site for faster results.
- Radiology equipment for x-rays to aid in immediate diagnosis.
- CT scanning equipment for a non-invasive 3-D image of internal organs.
- Cardiac monitoring that allows us to take an immediate risk assessment of the heart.

Yet the atmosphere is much more inviting than a hospital-based ER and wait times are minimal.

OUR PHILOSOPHY OF CARE

At Texas Emergency Care Center, we exceed the standard of emergency medical care. Our patients receive exceptional service in a prompt, convenient,

friendly environment by dedicated Emergency Medical Professionals for urgent and emergent medical conditions.

Texas Emergency Care Center offers high-quality emergency care that's close to home. Better yet, Texas Emergency Care Center helps take the stress out of emergency medical situations by providing a calming environment and personalized care. And perhaps most importantly, the physicians at Texas Emergency Care Center are Board Certified in Emergency Medicine and are committed to providing their patients with the highest level of care and personalized attention that big and busy ERs just can't offer.

EXPERTS IN EMERGENCY MEDICINE

Obviously enough, physicians who are Board Certified in Emergency Medicine are better trained to practice emergency medicine than other specialists. What many people don't realize is that many Emergency Rooms aren't always staffed with Board Certified Emergency physicians.

Texas Emergency Care Center takes pride in the fact that the entire staff of physicians is Board Certified in Emergency Medicine. This is their specialty. Beyond that, emergency care is their medical passion. While some doctors set out to do obstetrics or pediatrics, the team at Texas Emergency Care Center is inspired by the fast pace of emergency care and is trained to meet patients' most immediate needs.

The physicians at Texas Emergency Care Center are personable and available to spend time and talk with patients about their concerns and needs. There is a sense of genuine care at Texas Emergency Care Center. In fact, the doctors at Texas Emergency Care Center follow up with each of their patients personally by phone.

Texas Emergency Care Center's mission is to treat a wide array of urgent and emergent medical conditions while avoiding the typical inconveniences and adverse interactions of visiting a hospital-based Emergency Room. The practice's philosophy of care is to exceed the standard of emergency care and provide patients with exceptional service in a prompt, convenient, friendly environment. ■
