**Tango 1000™  
Packaged Mud Recycling System**

Utilizing KEMTRON'S patented multifunctional mud cleaning and desander technology, the Tango 1000™ is capable of cleaning 1,000 GPM (3785 lpm) of waste drilling mud. Designed to handle high solids and high viscosity the mud recycling / cleaning tank is divided into three compartments for a total holding capacity of 6,500 gallons (24,605 liters). Unique features such as a telescopic frame, removable desander & desilter manifolds and level controls for automated operation, make the Tango 1000™ the most user friendly, yet compact, system on the market.
