## WASTE MANAGEMENT AND SOLIDS CONTROL SOLUTIONS

KEMTRON Technologies, Inc.  
10050 Cash Road  
Stafford, TX 77477

[www.kemtron.com](http://www.kemtron.com)

**K**EMTRON Technologies is a leading provider of waste management and solids control solutions to worldwide customers in the oil and gas, trenchless drilling and geothermal industry. Located in Stafford for more than 20 years, KEMTRON has been manufacturing solids control equipment that solves unique environmental problems and pioneering the field of zero liquid discharge dewatering systems. In doing so, we have developed a unique set of core capabilities and products that have made us a leader in liquid/solid-separation technology.

### SETTING THE PACE

KEMTRON was the first company to obtain ISO 9001 certification for the design and manufacture of solids control and dewatering equipment. With more than two decades of product innovation, KEMTRON continues to raise the bar by manufacturing all our products to European CE Machinery Directive Standards and providing some of the industry's most aggressive delivery schedules and warranty terms. Supporting this drive is the strongest team of engineers, field-service technicians, manufacturing and assembly personnel and quality-control individuals in the industry today.

### PRODUCT PERFORMANCE

Although each product manufactured by KEMTRON is designed to meet the highest quality standards, the greatest value is in our unique system packaging capabilities. KEMTRON's systems can be built as a fully integrated mobile trailer, oil-field skid or in a climate-controlled enclosed structure. Integrated mobile solutions give both service providers and end users the ability to expedite project schedules and minimize unnecessary maintenance and setup costs associated with on-site production.

By focusing on each customer's unique problems, KEMTRON has become more than an original equipment manufacturer, we have become a sophisticated and trusted solutions provider. Allowing us to provide reliable products, service and expertise that exhibit industry-leading quality and ease of use, we promise to lead the way with new designs and innovative technology. As a result of this commitment, KEMTRON products can now be found in more than 30 countries. ■
